# Delivering Knowledge Empowering Rural

Innovior is a non-profit social enterprise led by passionate entrepreneurs, industrialists, and senior Indian Administrative Service officers supporting in catalysing sustainable development through state-of-the-art technology across India for rural livelihood transformation.

We have a wide ranging development approach. Our innovation focuses on myriad directions— technology, social mobilization approaches, local institution building, architecture of partnerships, management techniques etc. We have developed innovative technologies for clean water, waste management, energy, education, agriculture and healthcare helping in increasing equitable, affordable, sustainable energy access to achieve social and economic development of the people.

Although we are a very young organization, our leadership team works with a network of IIT's, IIM's, multilateral, bilateral agencies and other research institutions to develop a prototype or business model that has proven

viability in rural settings and potential for scalability. Once a prototype has been created and tested, we provide research support, market analysis expertise and helps in development and implementation of the model into a sustainable business. Our team brings in national and international experts including local and regional specialists, delivering need based solutions for the rural community.

Innovior is a platform to promote collaborative partnerships among diverse group of stakeholders, research institutions and community leaders across the system facilitating in technology development for adoption.

## Vision

Commitment to erase rural disparity and meet the growing aspirations of the rural population

## Mission

Help rural communities augment their livelihood with optimal application of technology and knowledge transfer

## Be a Part of the Change

Change starts with ideas. Connect with our growing platform of innovators, sector specialists, research institutions, community leaders and facilitators by sharing your innovative technologies and ideas for empowering last-mile communities

# Services

## Technology Innovation

Innovior supports and engages in innovative new ventures or with individuals to operate in the organised economy to get higher returns from operating in the official economy (e.g. by partnering with financial institutions and co-operating with established firms). Our technical innovation through its investment in R&D and all its associated elements, including partnerships with universities, research organisations and small to medium enterprises (SMEs) has been designed to reduce costs and optimize operations, to deliver leading edge functionality. We also provide skill development and employment opportunities and technology innovations that encourage people and businesses to move from the informal sector to the formal sector.

solutions and products for researchers and new product developers, enabling them to translate their ideas and innovations to produce solutions for Rural India towards a comprehensive R&D-based ecosystem.

## Research & Development:

Innovative research and development is the key strategy of Innovior. With our deep understanding of various livelihood sector and various technologies across the organization and our global reach, we are uniquely placed to provide rural community and society with integrated solutions to help them increase revenue and productivity in a sustainable way. We innovate eco-technology and business models to deliver integrated solutions at scale that are tailored to the complex need of growers around the world.

## Product Design & Manufacture

Our expert technology team designs and develops new products for organisations across a broad range of sectors including healthcare, communications, education and agriculture. We provide a one-stop product development service for you to take your product to market, from advising on business cases and creating initial concepts through to design and development; from manufacture and supply chain set-up to ongoing support for lasting success.

## Training and Capacity Building

To address the correlation between education, empowerment and rural livelihood transformation our capacity building programs have been designed with particular emphasis in improving the knowledge and skills of rural poor. We organise capacity building programs that covers formal as well as non-formal education, literacy as well as skills training. Education for rural people is an essential part of our endeavor and we adhere to this objective while designing the programs in educating all rural people including youth, adults and women.

## Technology Advancement & Prototyping Center

Innovior supports in potential entrepreneurial opportunities to enhance the transformation of the Social and Rural innovation ecosystem to a comprehensive technological entrepreneurial industrial R&D-based ecosystem. We support to establish and operate a sustainable state-of-the-art engineering services, advanced prototyping and rapid manufacturing center that provides customized engineering

Our services not only help in building capacities of the rural people, but also respond to the basic needs in reducing inequalities to the imperative of providing better tools and skills. Targeting the needs of the specific rural groups we customize our programs and design accordingly.

## Solar Powered Vaccine Refrigeration

## Our Initiatives/ Programmes:

Implementation of a framework on greater awareness and information available to communities about Rajiv Gandhi Gramin Vidyutikaran Yojana (RGVY) funded by UNDP

Equi-City project, funded by the European Union, to promote inclusive and sustainable growth of Indian cities through collaborative multi-stakeholder approach using participatory governance between local authorities and stakeholders, to ensure equitable provision of municipal

Services, to promote diversity within and capacity development of local government organisations.

South Asian Cities Summit - South Asian Mayors' Forum

## Low Carbon Development

## Climate Adaptation & Sustainability

### Capacity Building –Climate change training programmes

## Resource Assessment

\* For more project informations please visit our website [www.innovior.us](http://www.innovior.us)

**The Sustainable Environment Resource Institute (Innovior)** is a global initiative connecting cities, villages, organizations, sector & subject experts from academic & research organizations from across the world to share their best practices, policies, advises, funding options and commitment to reduce climate change impact and to make the Planet more green and clean. It promoted by well-known experts in the fields of engineering, science, climate change, social sciences and policy-making.

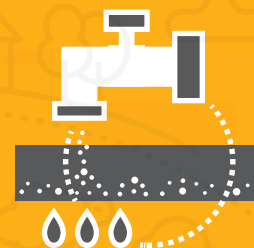

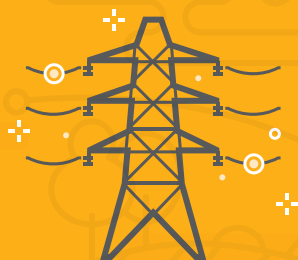

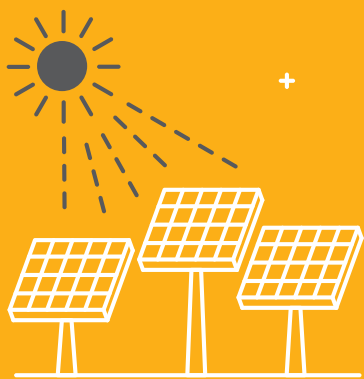

We help our stakeholders navigate technical, financial and policy requirements in renewable energy and energy efficiency and promote actions that make green power available to everyone. Our team provides advisory solutions to address the growing energy needs of the country through implementation of various environment friendly solutions and technologies.

**We focus on the following issues at Rurban level:**

- Urban Sanitation and Water Management
- Community Based Climate Change Programme (reduce the impact of climate change on vulnerable community)
- Energy including Renewable Energy (sustainable energy plans with focus on poor and rural community)
- Solid Waste Management
- Community Livelihood Programme
- Biodiversity
- Sustainable Development (addressing the Urban Sanitation issues, climate change, energy efficiency, clean water, etc)
- Disaster Management
- Sustainable Healthcare
- Rural Education (connecting students by providing digital classrooms)
- Urban Planning and Research Study
